

Kenji 20061 Staff Impression

Kenji's face has a soft oval shape with balanced features and a gentle jawline. His complexion is a warm, medium light-brown with a smooth, even tone and a healthy glow. Thick, jet-black curls form a full, voluminous afro, with coils that frame his face beautifully. His dark eyes are lively and warm, sitting beneath straight brows. A straight, well-proportioned nose and full lips round out his features, and when he smiles, prominent dimples appear on both cheeks, adding to his charm. Subtle stubble gives his face a touch of definition. He tends to dress simply, favoring clean, fitted neutral t-shirts that highlight his physique without being over the top.

Kenji is both intellectually driven and creatively inclined. He earned a Bachelor of Science degree and is currently pursuing a Master's in Architecture while working as a Graduate Assistant. Outside of his academic life, he's a passionate artist who enjoys drawing, painting, singing, and 3D modeling. He also spends time sculpting, hiking, and playing tennis. Staying active is important to him; he regularly runs, lifts weights, and swims, with volleyball being his favorite sport. He plays both the saxophone and piano.

He describes himself as "fairly unserious," with a laid-back, vibrant personality that balances hard work with a love of making others laugh. He's enthusiastic and intuitive, driven by a desire for wisdom and meaningful connections. At the same time, he's ambitious, disciplined, well-mannered, and genuinely fun to be around.

Looking ahead, Kenji hopes to become a licensed architect with a focus on adaptive reuse projects for underserved communities. He's also passionate about giving back, particularly in areas related to environmental stewardship and food insecurity. In his own words, he wishes others "the best on this journey," and hopes their child grows up "surrounded by love, kindness, and support," and that their family finds "joy and fulfillment in the years ahead."
