

Gethin 12881 Staff Impression

Gethin is intelligent, athletic, successful, attractive, and an all-around outstanding addition to our donor program. Standing at 6ft tall, he has a strong athletic build earned with years of soccer and basketball and maintained with weightlifting, intramural sports, and the occasional marathon. He has an oval face and a clear fair complexion. Standing in contrast to his fair skin is his beautiful and thick wavy dark brown hair and matching full eyebrows. He has genuinely kind and soulful round green-brown eyes, full lips, and a contagious smile.

Gethin has completed his education obtaining two bachelor's degrees in mechanical engineering; Applied Physics and is currently pursuing a career as a Nuclear Engineer. While continuing to progress in his career, he is also focused on maintaining and nourishing his relationships with family and friends. This is very important to him, and he holds those relationships very close to his heart. Gethin has a variety of hobbies including playing guitar, enjoying music festivals, burying his nose in a good book, and traveling the globe. He is a multi-talented, ambitious, compassionate, and caring person and we are very excited to welcome have him in our donor program.
