

Forge 20012 Staff Impression

Forge is a down-to-earth, thoughtful guy with a unique mix of talents and interests. At 6'3" with green-brown eyes and dark brown hair, and a large, athletic, muscular build, he's got an unmistakably strong presence. He has handsome and masculine facial features. , a full, closely cropped beard, arched eyebrows, and short, slightly tousled hair. What really stands out is his curiosity and drive. He has a master's degree in kinesiology and works in the rehab medicine field, where he helps people recover their mobility and live pain-free lives. His dream is to eventually open his own clinic where he can make an even bigger difference.

But Forge isn't just science and structure, he's incredibly creative too. He plays more than a dozen musical instruments, dabbles in photography and videography, and even builds furniture in his spare time. He also produces podcasts and short videos featuring interesting local voices. If something sparks his interest, he dives in headfirst.

He grew up in a big, close-knit family with three brothers, and those early bonds helped shape who he is—loyal, dependable, and supportive. These days, they still get together often, and Forge says his family gave him the stability and resilience that have helped him stay grounded while pursuing his many goals.

Forge became a donor because he believes deeply in helping others. He knows how meaningful it can be to build a family, and he's honored to play a small part in helping someone else on that journey.
